PRODUCT INSTRUCTION

深圳市普雷德科技有限公司
Shenzhen Pard Technology Co.,Ltd

Important note

1. Don't look directly at the IR infrared light, or it will cause your eye damage!
2. This product's infrared light will focus on a lot of energy in the open state, do not aim at flammable objects at close range, otherwise it may cause fire. When not in use, please close the IR infrared light, or enter in sleep mode!
3. This product needs to be adapted with a focusing function optical telescope (with AO focus or side focus), otherwise it may not be available!
4. A few optical telescopes may not be able to match this product because of the design of the optical path.

PARD
Digital night vision
NV007A

Operation Manual

Turn on the power. After starting up, adjust diopter first.

First, turn eyepiece dioptic adjustment ring till characters appeared become sharp in the screen. (This process does not need to go with a clear image in your view.)

Second, turn the objective lens focusing adjustment ring until a clear cross curve appears in the center of the screen.

Thirdly, (do sleeve installation as later described in next section) have the sleeve lock switch locked.

Turn the focusing ring of the attached telescope till the view become clear.

3. Sleeve installation

1. Put the eye piece of the selected telescope into the sleeve until the sleeve reaches the bottom of the telescope. Adjust connection angel if necessary and tighten the fastening screw for a stable connection.

(The attached sleeve applies to any eyepieces with the length within <45mm, if longer than this length please use insulated rubber tape wrap and fix it.)

Unpacking

This box contains a night vision optics with,

- | | |
|---------------------|---------------------|
| 1 sleeve; | 1 data cable; |
| 2 hexagon wrenches; | 1 software package. |

Storage card is not included. Please prepare a TF card (128g maximum) for data storage.

Installation

1. Battery installation

Please use 3.7V Lithium chargeable 3.7V flat battery 18650. Remove battery compartment cap and make sure setting the the positive polar towards to the direction inward. Put the cap back and screw it until tight. (Fail to do so may result in restarting!).

2. Adjustments

2. Connect the optics with the sleeve by aim the salient point on the sleeve base to the groove of the sleeve, then push and turn until hear the sound of clicking.
